Python | TypeScript | PostgreSQL | Linux | Wireshark | Nmap | FastAPI

Brief

I'm a 2026 Computer Science graduate from the University of Gondar, building a career in IT support, network operations and security operations. I'm hands-on with Linux, Cisco networking, Python and web security labs, and I bring a full-stack development background: during my internship I led a 9-member team building a full-stack system. I learn fast, document what I do, and enjoy turning messy problems into reliable, working solutions.

IT Support & Troubleshooting | Networking Fundamentals | Security Fundamentals (OWASP) | Linux & Bash | Python Automation | Full-Stack Web | SQL Databases | REST APIs

Experience

Full-Stack Developer Intern
Amhara Media Corporation (AMECO), Bahir Dar
Jun 2025 - Aug 2025

- Led a 9-member team building a full-stack Visitor Management System from planning to delivery.
- Designed and optimized database queries for media content and user data.
- Integrated backend services with the frontend and coordinated work across the team.

Cybersecurity Trainee
INSA Cybersecurity Summer Bootcamp
Summer 2026

- Trained in networking, Linux and security operations fundamentals through an intensive bootcamp.
- Explored project concepts for the Ethiopian context, including automated incident reporting and tamper-evident digital evidence.

Self-Directed IT & Security Labs
Independent
Ongoing

- Completed PortSwigger API testing labs (hidden endpoints, mass assignment) and wrote up the findings.
- Working through CCNA preparation with Packet Tracer; preparing for ISC2 Certified in Cybersecurity (CC).
- Run Fedora Linux as my daily driver and practice with Wireshark, Nmap and Bash.

Projects

AI-Based Career Guide
Capstone, 2026

- TypeScript, PostgreSQL, Prisma ORM, Gemini AI
- Built a web platform for skill-gap analysis, resume building and mock interviews.

PortSwigger API Testing Report
2026

- Web Security, API Testing, OWASP
- Documented hands-on exploitation of hidden endpoints and mass assignment vulnerabilities.

HAWI E-commerce Website
2026

- Web Design, E-commerce
- Designing a premium editorial online store for a new Ethiopian perfume and fashion brand.

Personal Portfolio
2026

- Astro, Vercel
- Fast, multi-page portfolio with project write-ups, essays and a light/dark toggle.

Education

University of Gondar
BSc. Computer Science
Graduated 2026

Language

English - Professional
Amharic - Native

Certifications

Cisco Networking Academy	Introduction to Cybersecurity, Python Essentials 1 & 2, Network Basics
ISC2	Certified in Cybersecurity (CC) - in progress
INSA	Cybersecurity Summer Bootcamp, 2026
University of Gondar	CEED Employability and Entrepreneurship Skills Training, Jun 2026
Other	Udacity Programming Fundamentals, IBM SkillsBuild Prompt Engineering, freeCodeCamp Responsive Web Design
